## Welcome

Thank you for purchasing The Transporter. By following the instructions and recommendations outlined in this user's manual you will be able to enjoy your case on many trips for years to come.

## Getting to Know Your Traveling Case

When you first open the packaging and reveal your traveling case the first thing you will notice is a sleek, compact case capable of holding all of your items securely while fitting in your pocket.

### Features:

Plastic Construction: The case is made from an injected plastic material that is very durable and resistant to many stains. The plastic material cleans easily and is dishwasher safe. Another feature of the plastic construction is that the case is resistant to drops and will not crack, dent, or cause any deformations.

Double Hinged Construction: A double hinged design on the top portion of the case allows the case to be extremely versatile. The double hinged design allows for a wide range of movement that allows the user full access to the interior of the case and provides a barrier to cross contamination of items and surfaces by acting as a stand.

Snap Lock: The case features a locking mechanism that keeps all items secure during a drop. The lock is designed to snap into place between the Front Lid and the Bottom. Snap lock allows the user to ensure that the case is fully closed and secure by providing an audio check.

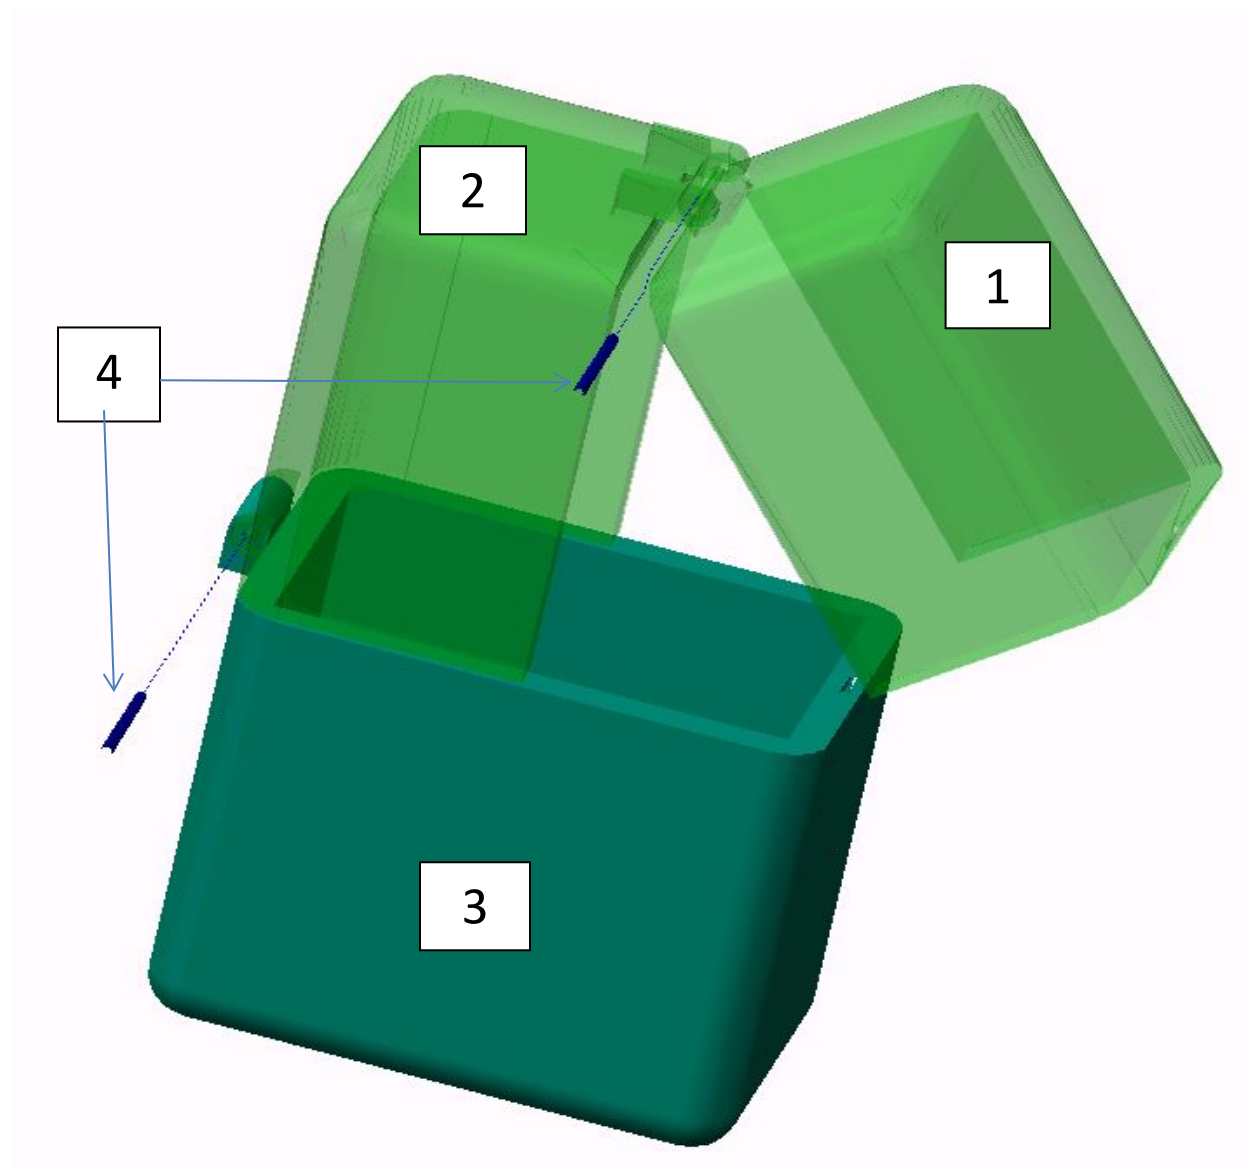

Fits In Your Pocket: The traveling is designed to fit in your pocket which ensures that you always have what you need when you need it. Rounded edges allow the case to sit comfortably in your pocket without irritating your legs.

## Assembly of the Case

The traveling case is comprised of four main components which include: (See Figure A-1 and Table 1 below, for a detailed view)

- Front Lid (1)
- Back Lid (2)
- Bottom (3)
- Pin (4)

Figure A-1:

The traveling case is preassembled out of the package but can be disassembled for a more thorough sanitization or to replace parts.

Assembly:

1. Align the hinges found on the side of the Back Lid (2) with the hinges found at the top of the Bottom (3).
2. Insert Pin (4) through both hinges until flush with each surface.
3. Next, align the top hinge on the Back Lid (2) with the hinge found on top of the Front Lid (1).

4. Insert Pin (4) through both hinges until flush with each surface.

Disassembly:

- To disassemble the case simply repeat steps 1-4 above in reverse order.

## **Everyday Use**

The traveling case is designed to securely hold all of your materials and be able to fit comfortably in your pocket. To use the case simply:

Opening:

- Push the Front Lid slightly back to release it from the locked position and pull up.

Filling:

- The Container Top is now free to move and the storage area is now exposed.
- To fill the case, simply drop in the items you need.

Closing:

- Arrange the top half of the case so that both pieces are parallel to each other.
- Push down on the top of the container until a click is heard.
- The click ensures that the case has closed securely.

## **Care and Maintenance**

The plastic construction is designed to make clean-up a breeze. To clean your cases simply follow these instructions:

Minor Cleaning:

- Use a warm, damp cloth to wipe the exterior of the case as needed.
- Use mild detergent as needed, rinse thoroughly.
- Shake off excess water and dry with a clean cloth.

Cleaning:

- Open the top of the traveling case and place up side down in a dishwasher.
- Let the dishwasher cycle and remove when complete.

**(DO NOT USE ABRASIVES OR SOLVENTS)**

To ensure longevity it is recommended that the case is cleaned every two to three trips. Also avoid any unnecessary drops or impacts to the case.

## Warranty Information

The traveling case is a product of uncompromising quality and we believe in standing behind our product. The traveling case comes with a five year limited warranty that includes:

- Complete Replacement
- Replacement Parts
- Money Back Satisfaction Guarantee

If, for some reason, the owner needs to replace a part, due to their error, they can order each piece individually, see Bill of Materials.

Table 1: Bill of Materials

Parts	Cost
Front Lid	\$2.99
Back Lid	\$2.99
Bottom	\$3.99
Pin	\$0.99
